

## DEVELOP A PYTHON SCRIPT

Date	21-10-2022
Team ID	PNT2022TMID07742
Project Name	Project - IOT based safety gadget for childsafety monitoring and notification
Maximum Marks	4 Marks
Submitted By	Uma Makesan.A

### SCRIPT:

```
a=int(input())
b=int(input())
c=a+b
print ("The sum is", c)
```

The screenshot displays the PyCharm IDE interface. The main editor window shows a Python script named `main.py` with the following code:

```
1 a=int(input())
2 b=int(input())
3 c=a+b
4 print ("The sum is", c)
```

Below the editor, the Run console shows the execution of the script. The command executed is `C:\Users\HP\PycharmProjects\IBM\venv\Scripts\python.exe C:/Users/HP/PycharmProjects/IBM/main.py`. The output shows the user inputting `4` and `8`, resulting in the printed message `The sum is 12`. The console also indicates that the process finished with exit code 0.
